It is important to provide teachers and administrators with all the information they need to make the best of decisions in the classroom. Classroom Vision Technology has created a suite of reports aimed at organizing the new Las Links data in a clear and concise form.

Administrators need Las Links reports that organize their grade-level performance. Teachers need reports that speak to their students' immediate needs and their need to efficiently organize their data. Classroom Vision Technology has created an innovative suite of LAS LINKS reports including, a student intervention report, class performance report, a cross-tab report, a mailing label with all student scores, and an Avery file folder label (with student name and level).

We are offering this complete suite of reports delivered electronically in 48 hours for \$.95 per student. This suite of reports is higher quality and more extensive than any currently available and for a reasonable price. We will also organize your reports by current class lists so teachers will have only the student and class list reports they need.

Printing is also available.
